Publication Date: 7 July 2014

Status: Current

Purpose

Fundamental to achieving our goals is a secure, stable and fair TLD.

The purpose of this policy is to describe the acceptable use of the TLD, our Service to you, and what action may be taken by us in the event of unacceptable use.

In order to serve the interests of members of the physiotherapy and physical therapy profession (hereafter referred to as physiotherapy), we will take actions to:

- Protect and maintain the integrity of the physiotherapy profession;
- Protect the security and stability of the Service;
- Comply with any applicable laws, government rules or requirements, dispute resolution processes, or valid requests of law enforcement agencies;
- Avoid any liability, civil or criminal, on our part, as well as our affiliates, related entities and subsidiaries, including officers, directors, and employees of such; and
- Correct mistakes made by us or any authorised user in connection with the use of the Service.

Mission and purpose of the TLD

The mission and purpose of the TLD is to benefit Internet users by ensuring increased trust, convenience and utility. The TLD will serve the interests of members of the physiotherapy profession as well as Internet users more generally. The TLD will provide an Internet space for the profession through the creation of an online identity for individuals, professional associations, affiliated persons and entities in connection with the profession.

The TLD will provide an authentic resource for members of the public in relation to physiotherapy, allowing for information and professional services to be accessed by end users in a simple, trusted manner.

The TLD will create awareness and add legitimacy to the industry; instilling significant user confidence and trust. It will provide members of the physiotherapy community with greater networking, advocacy, education, fellowship and business enterprising opportunities, as well as an opportunity to communicate with its customers directly and effectively. Further, it is intended that the creation of an industry specific physiotherapy internet name space will increase the service levels, relevance and accuracy of information that is available to the broader community of internet users, thus contributing towards a more positive user experience.
